Cognitive-stress theory thus emphasizes the role of cognitive appraisal in adjustment to loss; it is a variable that is similar, though not identical, to subsequent "meaning-making" conceptualizations

### **lamotrigine (lamictal) 25 mg tablet**

lamictal uses

McDaniel starts off by stating that it seems impossible to him to describe his process: "I don't know what I did; I only know what I tried to do, what I wanted to do." Yet he concludes his thorough and clear description of what he did in fact do with the observation that "it never occurred to me that anyone could mistake how the poem was made." So, the poet seems to be claiming, I the writer have no memory/control/culpability over my work, but to you the readers this process, so mysterious to me, should be utterly transparent
