Or does the freezing of one part of the surplus value in monetary form in the hands of certain capitalists mean that other capitalists will be left with a corresponding part of that surplus product in its material form? does the hoarding of realised surplus value by some imply that others are no longer able to realise their surplus value, since the capitalists are the only buyers of surplus value? This would mean, however, that the smooth course of reproduction and similarly of accumulation as described in the diagram would be interrupted

So those of us who really benefit from this diet are the ones whose hunger completely disappears and we discover that eating let's say 30-40% fewer calories each day doesn't leave us hungry and that's the paradox because every other diet, if you restrict your calories and you don't restrict your carbohydrates, you're just starving and as soon as you eat lots of fats, for some reason the body doesn't interpret it as starvation and so you don't get the symptoms of the "neurosis" we call it, of always worrying because once you start starving, all you do is you think about food all the time.
